The Aesthetic and Functional System

visio.lign

The aesthetic and functional system is set to impress with its unique options for creating natural beauty, function and physiology. It provides suitable tools for each workflow

for durable prosthetic restorations featuring colour stability and superior load capacity.

The open system offers flexibility and safety thanks to 6 compatible components:

crea.lign

veneering composite

novo.lign

veneers

neo.lign

denture teeth

visio.CAM

composite blanks

visio.paint

stains

Opalescence of
natural tooth

crea.lign

create natural beauty

Veneering composite

The light-curing veneering composite is significantly more impact-resistant than ceramic and features impressive natural opalescence, translucency and unparalleled light transmission. The aesthetics and abrasion values are comparable to those of natural teeth. crea.lign – for naturally beautiful teeth.

Opalescence of crea.lign

Dr. Vincenzo Musella, Modena, Italy

novo.lign

veneer natural beauty

Veneers

The novo.lign veneers are inspired and shaped by natural teeth. They feature an extended neck and a natural depth thanks to the morphological layer structure.

neo.lign

choose natural beauty

Denture teeth

neo.lign denture teeth are inspired and shaped by natural teeth. They have the same impressive natural light reflection, optimal surface structure and a natural depth. They feature the same shades, designs and materials as the novo.lign veneers, meaning they are optimised for fixed/removable restorations.

visio.CAM

design natural beauty

Composite blanks

The material benefits from the visio.lign system are also available for CAD/CAM processing. visio.CAM composite blanks are compatible with the entire visio.lign system.

visio.paint

colour natural beauty

Stains

The visio.paint and visio.lign color stains enable fast and simple individualisation of composite veneers.

DT Andrea Foschi, Ravenna, Italy
