New products 2023

360° IMPLANTOLOGY

NEW PRODUCTS **2023**

The SKY family is growing:

- copaSKY gingiva formers
- uni.fit titanium bases
- Optimised scan abutments
- uni.cone 0° and 17.5°
- TiSi Snap angled
- Try-in data as print templates

New products 2023

copaSKY

// copaSKY scan abutment 12

Coming soon!

COPASC12

- Titanium with optimal scannable surface
- Safe positioning
- Safe screw seating
- Highest accuracy

Coming soon!

COPUTBB0

Coming soon!

COPUTBB1

Coming soon!

COPUTBB2

Coming soon!

COPUTBB3

- For direct screw-retained bridge constructions
- Cylinder for slender framework
- Broad shoulder in four heights: 0 mm, 1.7 mm, 2.7 mm, 3.7 mm

// copaSKY uni.fit titanium base L

Coming soon!

COPAUTL2

Coming soon!

COPAUTL3

- Broad shoulder to maintain minimum wall thickness
- Reinforced chimney
- Height 1.5 and 3.0 mm

// copaSKY uni.fit titanium base for CEREC®

COPCTBS2

COPCTBS3

- For anterior tooth area slim CEREC® titanium base
- Height 1.5 and 3.0 mm

// copaSKY uni.fit titanium base height 0 mm

Coming soon!

COPAUTB0

- copaSKY titanium base S
- Height 0 mm
- Minimum construction height

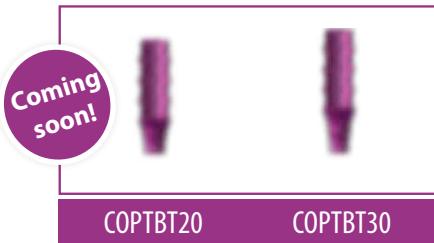

- For thin gingival phenotype
- uni.fit titanium base rests directly on the implant shoulder
- Available for single crowns and bridges

// copaSKY Ti-base temp

Coming soon!

COPTBT20

COPTBT30

// copaSKY Ti-base temp bridge

Coming soon!

COPTBT2B

COPTBT3B

- Temporary titanium abutments for
- Individual gingiva formers
- Temporary abutments
- Temporary crown abutments
- Can be shortened
- Library of anatomical shapes

// copaSKY gingiva former M

COPAGF66

COPAGF88

- New slim concave form for 6mm
- New height 8 mm

// copaSKY gingiva former L

COPAGFL4

COPAGFL6

COPAGFL8

- Broader gingiva former for the posterior region
- Particularly suitable for individual abutments
- Height 4–8 mm

**// copaSKY
Gingiva former needle**

COPAGFN6

- Transgingival healing with maximum soft tissue attachment
- Height 6 mm

// BioHPP copaSKY elegance S abutments

COPAES00

COPAES15

- The BioHPP SKY elegance hybrid abutment is the abutment for one-time-therapy and immediate restoration - and is now available in a slim S version.

// copaSKY titanium abutments additional gingiva height 1.5 mm

COPAPF00

COPAPF15

COPAPF16 R

COPAPF25

COPAPF26 R

// copaSKY uni.cone abutments

COPAUC04

- Additional height for straight copaSKY uni.cone abutments:
0° uni.cone with 4.0 mm height

additional angulation 17.5°

COPUC172

COPUC173

- Despite the open occlusal thread, there is stability of the connection between the abutment and the bridge through form fit: low risk for screw loosening and fracture.
- Angled uni.cone in two heights 1.5 and 2.5 mm

New products 2023

SKY

// SKY scan abutment 11

- Titanium with optimal scannable surface
- Safe positioning
 - Safe screw seating
 - Highest accuracy

SKYUSC11

// SKY Ti-base temp

- Temporary titanium abutments for
- Custom gingiva formers
 - Temporary abutments
 - Temporary crown abutments
 - Can be shortened
 - Library of anatomical shapes

SKYTBT00

// SKY titanium base L

- Broad shoulder to maintain minimum wall thickness
- Reinforced chimney
 - Height 1.5 and 3.0 mm

SKYUFCL2

SKYUFCL3

// SKY uni.cone abutment additional angulation 17.5°

SKYUC174

SKYUC175

- Despite the open occlusal thread, there is a stability of the connection between the abutment and the bridge due to form-fit – low risk of screw loosening and fracture
- Angled uni.cone in two heights: 4 mm and 5 mm

SKY pro Guide

// SKY drill sleeve 4 mm

GDSL04D475

10 pieces
GDSL04D47510

SKY PRO GUIDE

- SKY guided drill sleeve 4.75 L4

Free STL data for TRY-INS

SCAN ME!

STL data is available on our website for the best possible abutment selection on the titanium and uni.cone abutments including the Docklocs® models. This means that the desired variant can be printed as required.

// SKY uni.cone gingiva formers

Now with dual function:

- Gingiva former
- RevoCone® Primary Cone Crown
 - Easy conversion from fixed to removable – when the patient is no longer able to clean
 - Addition of a standard component for SKY and copaSKY uni.cone to the individual RevoCone solution

SKYUCRC1

RevoCone

The removable bridge

It is a double crown system and enables a removable bridge on implants. The abutments are manufactured from prefabs using the CAD/CAM process and bonded with a prefabricated taper connection.

The resin matrices available in various thicknesses prevent the bridge from jamming on the cone.
