READY FOR USE

Supporting Digital Dentistry

Procedure

The secure **READY FOR USE** platform allows you to upload the patient's DVT data and the IO scan to a secure server in the cloud. If you do not have an IO scanner, send the models to CONFIDENTE and they will be digitised for a small fee. CONFIDENTE uses this data to carry out 3D planning.

Then check and correct the 3D planning. After your approval, the drilling template is produced and you receive a package containing the drilling template and the planned implant. An experienced medical device consultant from bredent medical will support you during the first surgical procedure.

GUIDED OFFERS

360° IMPLANTOLOGY
- MORE THAN IMPLANTS -

Your 3D Full Guided Package

digital

The package includes the following services:

- DVT evaluation and matching with IO-scan
- Planning the implants
- Production of the drilling template
- Support during the first surgical procedure
- Secure data exchange thanks to **READY FOR USE**

Drilling template for ONE implant
incl. planning service:

335 €
incl. VAT

Your 3D Full Guided Package

analogue

The package includes the following services:

- Receipt of models
- Digitisation of the models
- DVT evaluation and matching with STL data
- Planning the implants
- Production of the drilling template
- Support during the first surgical procedure
